

Thoughtful Progressive Cuisine

Set amongst the serene DoublePool villas by Banyan Tree, Tre has been the resorts fine dining destination which has reworked the entire menu by focusing on locally grown produce from Phuket while the rest of the ingredients have been sourced from the closest possible destinations to generate the lowest possible carbon foot print. This is in keeping with Banyan Tree's core commitment to protecting and sustaining the environment within which we operate.

Inspired by using local farm fresh produce in creative dishes with global twist, we wish to reflect the seasonality, treat the local produce with respect and use organic produce when possible, all out together with a refined technique.
